## Four color turntable pad printing machine

### 1. Application

High-speed rotary plate printing machine, in a production cycle to achieve multi-color overprinting, the rotary plate can be turned a box to print a product using high-precision CNC processing rotary, fast speed, high precision, stable performance, can be equipped with hot air system. Suitable for electronic products, plastic shell, stationery, toys and other surface pattern LOGO printing.

### 2. Technology parameter

|                          |                   |                          |                   |
|--------------------------|-------------------|--------------------------|-------------------|
| Model NO.                | MC-100*300-4C     | Model NO.                | MC-150*350-4C     |
| Printing area            | 70*250mm          | Printing area            | 120*300mm         |
| Printing speed           | 800pcs/h          | Printing speed           | 600pcs/h          |
| Standard steel size      | 100*300mm         | Standard steel size      | 150*350mm         |
| Up and down stroke       | 75mm              | Up and down stroke       | 75mm              |
| Front and back stroke    | 160mm             | Up and down stroke       | 160mm             |
| Glue head adjusted angle | 360°              | Glue head adjusted angle | 360°              |
| Printing colors          | 4                 | Printing colors          | 4                 |
| Work piece max height    | 140mm             | Work piece max height    | 140mm             |
