

300 Curved screen printing machine

1. Specification

Model No.: MC-300

Printing Area: $\Phi 80*200\text{mm}$

Printing speed: 1200pcs/h

Power: 220v 60Hz

Size: 90*85*130cm

Weight: 97KG

Pneumatic pressure: 5 -10bar

2. Application

Small curved screen printing machine, the whole machine adopts the original Japanese and Taiwan pneumatic components, running speed, stable quality, low noise, color accuracy, such as cosmetics, chemical containers, food packaging and related flat surface products LOGO screen printing, due to small size, wide application, affordable, this machine is currently the most manufacturers use the model, It's a super economical machine.

3. Technology parameter

1. Microcomputer control each function operation, high degree of automation, simple and convenient operation.
2. Built-in four-digit automatic counter.
3. It has the function of round and cone printing.
4. Automatic scraping, inking, table lifting, etc., not only simple operation, but also ensure the stability of printing quality.
5. Adjustable printing stroke and speed to meet different printing requirements.
6. Automatic balancing scraper to ensure balanced printing pressure.
7. Table and frame can be adjusted before and after, left and right, up and down, high printing precision, convenient and fast adjustment
8. The part of the scraper can be lifted independently, and the replacement and cleaning of the net frame are easy and convenient
9. Maximum printing area: $300 \times 200\text{mm}$
10. Maximum frame size: $400 \times 300\text{mm}$
11. Min frame size: $230 \times 140\text{mm}$
11. Printing length: $<280\text{mm}$
12. Printing taper: positive <15 degrees, negative <7 degrees

4. Picture display

Remark: This device is available in different models such as 300/400/600/700/800
