

Automatic pad printing machine

1. Application

This automatic pad printing machine is mainly manufactured by large-volume manufacturers, automatic feeding, automatic printing, automatic blanking, the whole intelligent unmanned operation, printing multiple products each time, the output of up to 6000-12000 finished products per hour, the printing pattern is beautiful, is a must for large-scale manufacturers.

2. Technology Parameter

1. MCU compiler action program, easy to operate
2. Automatic four-digit counter to count the number of prints
4. The position of workbench, glue head and oil pan can be adjusted arbitrarily on X.Y.Z axis
5. Independent adjustable pressure of ink suction and printing head
6. Environmentally friendly oil cup system, save ink and open oil water
7. Product fixing method: fixture fixing
8. Automatic feeding and material separation
9. The speed of all cylinders is adjusted independently
10. The original Japanese SMC and Taiwan MINDMAN pneumatic components are used
11. The adjustment position is marked with scale
12. The machine running speed is fast, stable, low noise
13. Action mode selection: Fully automatic
14. Starting mode: panel/foot switch
15. Front and rear travel: 200MM
16. Up and down stroke: 75MM
17. Printing speed: 6000-12000 / hour, multiple printing each time
18. Power supply: 220V 50-60MHZ
19. Power air source: 5-7BAR

3. Picture display
